DETAILED ACTION

Affidavit

1. The Declaration under 37 CFR 1.131 filed on 12 December 2008 under 37 CFR 1.131 is sufficient to overcome the **RUEDA** reference.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Tadashi Horie (Registration No. 40,437) on 04 December 2009. Please cancel claim 42 and amend claims 35 and 113 as follows:

35. A prosthetic hearing device comprising:

- i. a sensor for detecting a speech;
- ii. a speech recognition processor that performs speech recognition on the detected speech, wherein the speech recognition processor performs speech recognition, in view of at least one of a physical state of the user and an operating condition of the prosthetic hearing device;
- iii. a speech generator that analyzes results of speech recognition to comprehend a semantic meaning in the detected speech and transforms the detected speech into a speech having a speech form assistive in understanding the semantic meaning in the detected speech;

- iv. an output device that outputs the generated speech to a user; and
- v. an input device, wherein the speech generator, when receiving a reproduction instruction through the input device from the user, reproduces the speech previously produced.

113. A prosthetic hearing device comprising:

- i. a sensor for detecting a speech;
- ii. a speech recognition processor that performs speech recognition on the detected speech;
- iii. a speech generator that analyzes results of speech recognition to comprehend a semantic meaning in the detected speech and transforms the detected speech into a speech having a speech form assistive in understanding the semantic meaning in the detected speech, wherein the speech generator transforms the detected speech in view of at least one of a physical state of the user and an operating condition of the prosthetic hearing device;
- iv. an output device that outputs the generated speech to a user; and
- v. an input device, wherein the speech generator, when receiving a reproduction instruction through the input device from the user, reproduces the speech previously produced.

Allowable Subject Matter

3. Claims 35, 37-38, 40-41, 43-45, 47, 51 and 113-115 are allowed. The following is an examiner's statement of reasons for allowance: As per the Declaration under 37 CFR 1.131 submitted 12 December 2008, the previous **RUEDA** reference has been overcome as the instant application has an earlier effective filing date. After a follow up search, the closest reference

found was **Blackmer et al. (US Patent No. 5,393,236)**, which performs an interactive speech pronunciation assistance. While the **BLACKMER** reference does mention a headset-like orientation, it fails to perform any substantive speech recognition, specifically related to semantics. Further, it fails to disclose an input device, wherein the speech generator, when receiving a reproduction instruction through the input device from the user, reproduces the speech previously produced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
